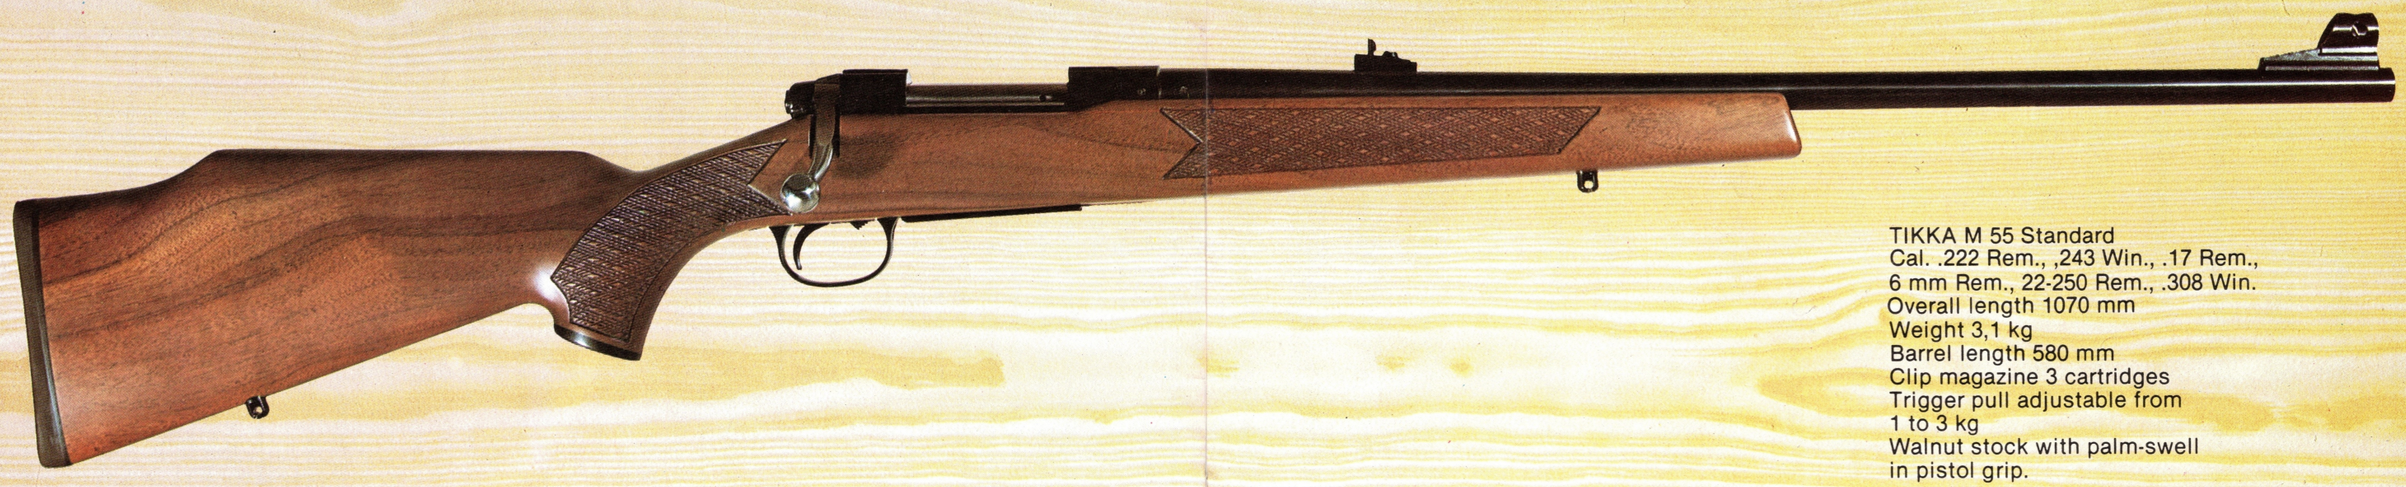
TIKKA -78

TIKKA rifles

The design of Tikka's current range of rifles and shotguns is based on a long experience of producing craftsman built weapons. As long ago as 1918 Tikka were already manufacturing guns for the Finnish army. Special features include hand checkered stocks and individual attention to barrel rifling which accounts for the Tikka's superb accuracy.
The unique design of all rifle bolts ensures an exeptionally smooth action. The free floating barrel available on all models guarantees pin-point accuracy in all weather conditions.
Extra safety is built into all Tikka guns, special hammer bolts incorporated into the Tikka shotgun action prevent any chance of an accidental discharge should the gun be dropped when loaded.
Tikka have been making fine shotguns for thirty years and their current range includes the **M 77** O/U shotgun and Sweden's most popular shotgun-rifle combination **M 07.**
Now included in Tikka's range of centerfire-rifles are sporter versions of both their highly successful **M 55** and **M 65** hunting rifles.

NEW

In 1978 Tikka will be intorducing two new models. The **M 65** target rifle and the **M 77 K** shotgun-rifle combination. The **M 65** will incorporate a completely redesigned stock and will conform in all respects to I.S.U. competition requirements. The **M 77 K** shotgun-rifle will offer shooters a choice of larger rifle calibers as a more powerful alternative to the present **M 07.**



TIKKA M 55 Standard
Cal. .222 Rem., ,243 Win., .17 Rem.,
6 mm Rem., 22-250 Rem., .308 Win.
Overall length 1070 mm
